## FOR IMMEDIATE RELEASE

### HEAT GUNS ELIMINATE SHRINK TUNNELS

A full line of heat guns and nozzles that eliminate the need for shrink tunnels in typical low volume shrinking applications is available from Malcom Hot Air Systems of Portsmouth, Rhode Island.

Malcom's Leister® Hand-Held Heat Gun feature temperatures up to 1,300°F with adjustable air flows to 30CFM and are available with a wide variety of nozzles for shrink wrapping all types of products. Suitable for hand shrinking or for use in conveyor system, these heat guns are capable of eliminating the need for shrink tunnels in low volume applications.

Effectively replacing heat lamps, quartz and infrared heaters, and other passive heat sources, Malcom's Leister® Hand-Held Heat Guns can be equipped with different nozzles to concentrate or spread the heat, in a controlled manner, as required. Incorporating built-in electronics which provide over-load protection, they can also be used for curing, laminating or drying.
